

Scholarship-and-Internship-Management

PROBLEM STATEMENT: Students struggle to find and apply for scholarships and internships due to scattered and unorganized information, while organizations lack a centralized system to post and manage verified opportunities efficiently.

ABSTRACT

The Scholarship and Internship Management Platform is a web-based system designed to simplify the process of accessing and managing scholarships and internships. With a vast amount of scattered information available, students often struggle to find reliable opportunities, leading to confusion and missed chances. This platform acts as a centralized hub where organizations can post verified scholarships and internships, ensuring students have access to accurate listings. It features a Scholarship Section that provides scholarship details and an Internship Section that lists internship opportunities. Students can easily explore and apply for relevant opportunities without navigating multiple sources. The Admin Panel enables organizations to manage postings efficiently and track student applications, while students benefit from a user-friendly interface with MERN Stack for seamless exploration and application.
